

Relesoft Oy - Systems, solutions and services for ERTMS  
signalling systems.

**Relesoft's beginning was a public procurement without reference requirements.**

What we can learn from it?

Whats is the difference between consulting and product based approach?

Why European railways do need new “new blood”?

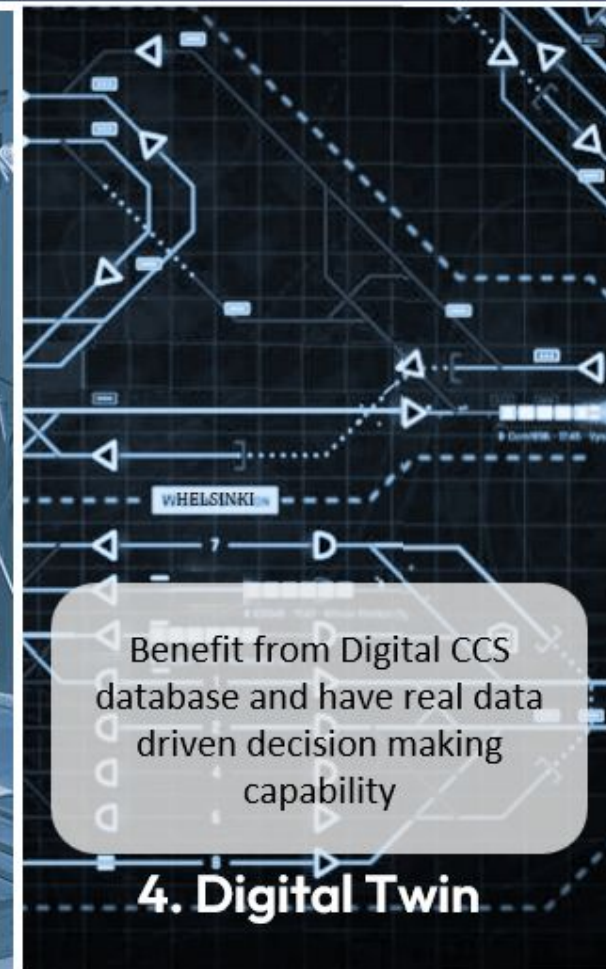

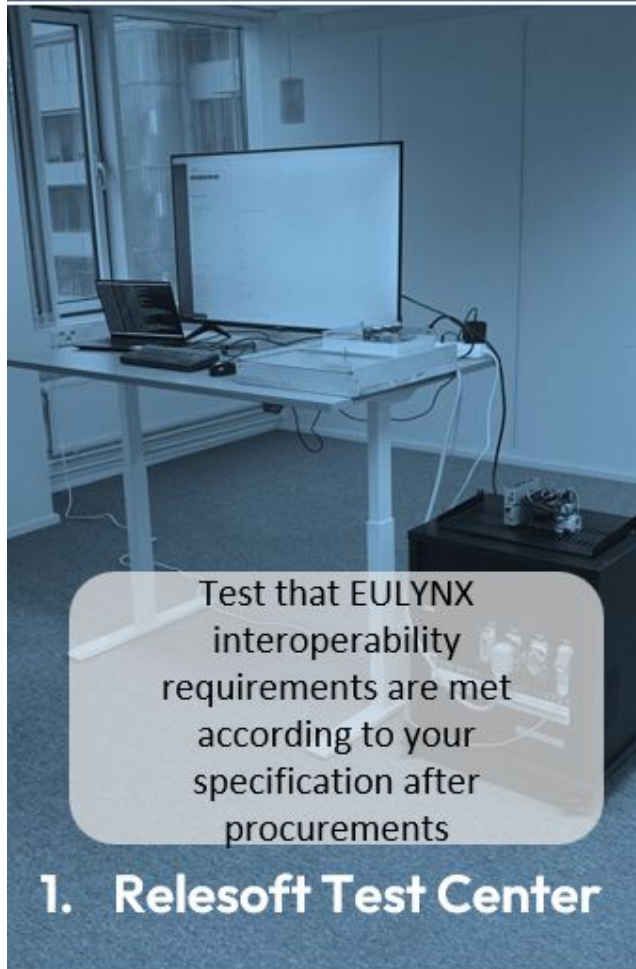

**Relesoft's did a good work and EULYNX Consortium awarded this work with a contract for three years (2024 - 2026)**

# Relesoftin testaus- ja elinkaarenhallinnan palveluun kohdistuu paljon mielenkiintoa

# The best way to manage life cycle of CCS system

# Relesoft – when excellence is needed

# Thank you!

**relesoft**  
Reliable Smart Solutions
